

Margherita Harris

Visiting Fellow in Philosophy at the London School of Economics' Department of Philosophy, Logic and Scientific Method.

Mini-bio: Margherita Harris recently completed her PhD at the London School of Economics' Department of Philosophy, Logic and Scientific Method. Her research interests lie in epistemology and the philosophy of science, with a special focus on modelling under uncertainty, robustness analysis and climate science. She is also interested in foundational issues in the philosophy of statistics.

Publications and some work in progress

- ["The Epistemic Value of Independent Lies: False Analogies and Equivocations"](#). Synthese (2021).
- "Model-based Robustness Analysis as Explanatory Reasoning: An Evaluation". Manuscript available on request.
- "Confidence and Likelihood: Some Conceptual Problems in the IPCC Uncertainty Framework, and How They Came About". Manuscript available on request.
- ["Conceptualizing Uncertainty: The IPCC, Model Robustness and the Weight of Evidence"](#). PhD Thesis (2021).
